

Getting started

<div class="callout callout-warning"> <div class="callout-header"> <div class="callout-icon-container"> <i class="callout-icon"></i> </div> <div class="callout-title-container"> Disclaimer </div> </div>

<div class="callout-body"> <p> This website is under continuous development. Content may be incomplete or subject to change. </p> <p> The PEH Data Platform User Guidance is provided for informational purposes only and does not constitute legal or regulatory advice. </p> </div> </div>

Purpose of this page

This page explains what you need in order to start using the **PEH Data Platform** and what the platform is (and is not) intended to do.

Before you begin

To use the PEH Data Platform, you typically need:

- Access to the platform (web-based or local deployment)
- Input data structured according to the relevant PEH specifications
- The corresponding codebook or metadata template

No installation or programming is required.

Typical use

In most cases, users will:

1. Prepare their data following the agreed template
2. Load the data into the PEH Data Platform
3. Inspect structure, variables and value domains
4. Export results or reports for further review

Each of these steps is explained in more detail in the **User guide**.

Important boundaries

Warning

The PEH Data Platform: - does not correct or impute data - does not replace study-specific validation procedures - does not assess scientific validity of the data

Users remain responsible for the correctness and interpretation of their data.

Next steps

Continue with the **User guide** for a detailed explanation of inputs, outputs and limitations.
